Fall 2023 (currently enrolled)

DSCI 311 – Principles and Techniques of Data Science
Fall 2023 (currently enrolled)

Awards and Achievements

University of Oregon

University of Oregon Apex Scholarship
Dean's List

Las Lomas High School

Academic Honor Roll
CSF Pin and Gold Sea

Work Experience

Knight Library, Eugene – Lending Services Assistant 3

October 2021 – Now

I work in book circulation (check-out/check-in). I also provide assistance to patrons' reference and directional questions about the library at the front help desk. I am often asked to create accounts for public patrons not affiliated with the UO in order to take advantage of the Knight library resources. Up in the stacks, I am responsible for reshelving, keeping the shelves clean and organized, and maintaining a safe and structured environment for patrons to take part in. As an LSA 3, I am often responsible for leading groups of my coworkers in circulation tasks.

CS and DSCI Department, Eugene – Learning Assistant

Winter Term 2023 and Fall Term 2023

I work with students in the Foundations of Data Science I course at University of Oregon. By holding weekly office hours, students are able to ask me their questions on assignments and concepts from the course. I also assist with two 2 hour labs each week where students work through a lab focused on what is discussed in class.

Campus Leadership/Membership

UO WiCS (Women in Computer Science)

Member since 2021, General Executive Member 2022-2023, Secretary 2023-2024

In this group, I found a community of people who have supported me through my years at UO. I have participated in planning two of our TechTogether events and am one of the leading planners for the 2024 TechTogether. As a general executive member my sophomore year, I helped plan weekly meetings and organized my own meeting where an alumni spoke about job hunting. This year, as secretary, I have been tasked with keeping our club's google drive up to date, taking meeting notes, and checking and responding from the club email.

UO LeetCode Club

Member since 2023

Meeting weekly, we spend an hour on two LeetCode problems in any language we prefer. After working alone or in groups, we review how to solve these problems as a club and explore different ways to achieve the best time complexity and memory usage.

UO Data Science Club

Founding Member since 2023

Starting the group at the end of Spring 2023, I have gone to meetings that have explored how to understand language processing, how to approach the data science career field, and helped with organizing options for future events.
