

# Lillian Logan

Pronouns: she/her – Preferred name: Lily

Available to work after June 14th

---

As a Data Science and Computer Science major with a minor in Economics, I am deeply fascinated by the evolution of AI coupled with machine learning and its potential applications for the broader public. My involvement in the Women in Computer Science club at UO has ignited a passion for fostering an inclusive tech environment, ensuring that all minority groups feel embraced. I am dedicated to advancing this mission alongside my enthusiasm for AI in any future career pursuit.

Winter 2024 (currently enrolled)

## Work Experience

**Knight Library, Eugene – Lending Services Assistant 3**

October 2021 – Now

- Assist customers with book circulation, managed check-out/check-in processes, and addressed reference and directional questions.
- Maintain an organized environment within the library ensuring patrons have a safe space for various activities
- Provide leadership by guiding circulation tasks within a team of colleagues.

**CS and DSCI Department, Eugene – Learning Assistant**

Winter Term 2023 and Fall Term 2023

- Teach complex data science concepts to students during weekly office hours
- Assist in teaching weekly labs by guiding students through hands-on activities focused on the current week's course content.

## Campus Leadership/Membership

**UO WiCS (Women in Computer Science)**

Member since 2021, General Executive Member 2022–2023, Secretary 2023–2024

- Contributed in planning 2 TechTogether events—one speaker and one Blender workshop.
- Facilitated a meeting where club alumni shared valuable job hunting tips, providing guidance for current members.
- As the club secretary, I maintained and organized important documents and communication channels within our Google Drive and Gmail.
- Successfully elevated club membership by over 50%, fostering a more engaged club community.

**UO LeetCode Club**

Member since 2023

- Collaborated in team based problem solving sessions, participating in tackling LeetCode problems.
- Compare multiple solutions in various programming languages to draw insight into optimal time complexity and memory usage.
